

Now it costs even less to bring the power of Wavestore to smaller applications

For a limited time only you can purchase this small, yet powerful, compact NVR preloaded with up to 6 Base channel licences at no extra cost. It's easy to add additional licences, either at time of order or at a later date; or upgrade to Premium or Enterprise level to take advantage of enhanced functionality, such as the ability to configure multiple units to run as a server group.

Wavestore's ultra-compact A-Series NVRs are designed to offer a robust and reliable recording, management and control solution for security and video surveillance projects with small camera counts. With the ability to connect up to 8 network cameras per standalone unit, the near-silent operation A-Series comes complete with a VESA mounting plate for attaching to the rear of a monitor – perfect for unobtrusive surveillance applications.
